

IM360 Curriculum Map

This resource includes:

- Learning components assessed in each Milestone
 - *Note: Standards marked with an asterisk (*) indicate that one or more learning components have a restriction*
- Standards, curriculum-specific focus lessons, and common misconceptions related to each learning component

How to Use

1. Locate each learning component that appears on your Prepare for Instruction report.
2. Identify the focus lesson(s) for predicted strengths and predicted challenges.
3. Learn about common misconceptions and strategies in the Instructional Moves modules.
4. Plan instruction for each focus lesson and consider...
 - a. Continuing with regular instruction for predicted strengths
 - b. Applying strategies from the Instructional Moves modules to address misconceptions for predicted challenges

Grade 2 Learning Component Map

Milestone 1

Assess after: Unit 1, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.NBT.B.5*	Fluently subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction <i>(Restricted to subtraction within 20)</i>	2.1.4	Coming Soon
	Fluently add within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction <i>(Restricted to addition within 50)</i>	2.1.5	Coming Soon
2.MD.D.10	Solve one-step, put-together problems using information presented in a bar graph	2.1.13	Coming Soon
	Solve one-step, compare problems using information presented in a bar graph	2.1.13	Coming Soon
2.OA.A.1*	Use addition within 100 to solve one-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions <i>(Restricted to compare problems)</i>	2.1.15	Coming Soon
	Use subtraction within 100 to solve one-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions <i>(Restricted to compare problems and subtracting multiples of 10 within 100)</i>	2.1.16	Coming Soon

Milestone 2

Assess after: Unit 2, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.OA.A.1	Use drawings or equations with a symbol for the unknown number to represent one-step addition problems within 100	2.2.1	<i>Coming Soon</i>
	Use subtraction within 100 to solve one-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions	2.2.3	<i>Coming Soon</i>
	Use addition and subtraction within 100 to solve two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions	2.2.14	<i>Coming Soon</i>
2.NBT.B.5	Fluently add within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction	2.2.9	<i>Coming Soon</i>
	Fluently subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction	2.2.9	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.MD.A.1	Use an appropriate tool to measure the length, in standard units, of an object	2.3.3	<i>Coming Soon</i>
	Select an appropriate tool to measure the length, in standard units, of an object	2.3.5	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.MD.A.4	Measure to determine how much longer one object is than another	2.3.3	<i>Coming Soon</i>
2.MD.A.2	Describe how two measurements for the same object relate to the size of the units chosen	2.3.9	<i>Coming Soon</i>
	Measure the length of an object twice, using different length units for the two measurements	2.3.9	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.MD.B.6	Represent whole numbers as lengths on a number line diagram	2.4.1	<i>Coming Soon</i>
	Represent whole-number differences on a number line diagram	2.4.7	<i>Coming Soon</i>
	Represent whole-number sums on a number line diagram	2.4.7	<i>Coming Soon</i>
2.MD.B.5	Use equations, with a symbol for the unknown number, to represent addition within 100 in word problems involving length	2.4.13	<i>Coming Soon</i>
	Use subtraction within 100 to solve word problems involving lengths that are given in the same units	2.4.13	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.NBT.A.1	Decompose a two-digit number into its tens and ones	2.5.3	<i>Coming Soon</i>
	Decompose a three-digit number into its hundreds, tens, and ones	2.5.3	<i>Coming Soon</i>
	Given the number of hundreds, tens, and/or ones, write a three-digit number	2.5.4	<i>Coming Soon</i>
2.NBT.A.3	Read and write numbers to 1,000 by moving between base-ten numerals (standard form) and expanded form	2.5.5	<i>Coming Soon</i>
	Read and write numbers to 1,000 by moving between number names (word form) and expanded form	2.5.6	<i>Coming Soon</i>
2.NBT.A.4	Compare two three-digit numbers by comparing the digits in each place value	2.5.10 and 2.5.11	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 6, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.G.A.1	Identify quadrilaterals	2.6.1	<i>Coming Soon</i>
	Identify hexagons	2.6.1	<i>Coming Soon</i>
2.G.A.3	Partition objects, including circles and rectangles, into three equal shares and describe the shares using "thirds"	2.6.7	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 6, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	Describe a whole based on its number of parts, including two halves, three thirds, and four fourths	2.6.9	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.NBT.B.7	Add or subtract hundreds and hundreds, tens and tens, ones and ones	2.7.2	<i>Coming Soon</i>
	Add within 1,000 using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction	2.7.4 and 2.7.9	<i>Coming Soon</i>
	Subtract within 1,000 using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction	2.7.4 and 2.7.16	<i>Coming Soon</i>

Milestone 8

Assess after: Unit 8, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
2.OA.C.3	Determine whether a group of objects (up to 20) has an odd or even number of members	2.8.3	<i>Coming Soon</i>

Milestone 8

Assess after: Unit 8, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	Group objects into pairs to determine if the group of objects (up to 20) has an odd or even number of members	2.8.3	<i>Coming Soon</i>
2.OA.C.4	Determine the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns	2.8.7 and 2.8.8	<i>Coming Soon</i>
	Write an equation to express a total as a sum of equal addends	2.8.9 and 2.8.10	<i>Coming Soon</i>
2.G.A.2	Count to find the total number of same-size squares in a partitioned rectangle	2.8.12	<i>Coming Soon</i>

Grade 3 Learning Component Map

Milestone 1

Assess after: Unit 1, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.OA.A.1	Model a multiplication situation, including by writing a multiplication expression	3.1.11 and 3.1.18	<i>Coming Soon</i>
	Identify a multiplication situation based on a given multiplication expression	3.1.11	<i>Coming Soon</i>
	Interpret the product of two whole numbers as the number of groups times the size of each group, or vice versa	3.1.11	<i>Coming Soon</i>
3.OA.A.3	Solve one-step multiplication problems within 100	3.1.12	<i>Coming Soon</i>

Milestone 2

Assess after: Unit 2, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.MD.C.6	Measure the area of a rectangle by counting unit squares	3.2.4	<i>Coming Soon</i>
3.MD.C.7.b	Use multiplication to find the area of a rectangle with whole number side lengths in the context of solving mathematical problems	3.2.9	<i>Coming Soon</i>
	Use multiplication to find the area of a rectangle with whole number side lengths in the context of solving real-world problems	3.2.10	<i>Coming Soon</i>

Milestone 2

Assess after: Unit 2, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.MD.C.7.d	Find the area of rectilinear figures by decomposing them into non-overlapping parts and finding the area of each part	3.2.12 and 3.2.13	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.NBT.A.2	Fluently add within 1,000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction	3.3.3 and 3.3.6	<i>Coming Soon</i>
	Fluently subtract within 1,000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction	3.3.12	<i>Coming Soon</i>
3.NBT.A.1	Round whole numbers to the nearest 10	3.3.15	<i>Coming Soon</i>
	Round whole numbers to the nearest 100	3.3.15	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.OA.A.2	Interpret whole number quotients as the number of objects in each group when a set number of objects is partitioned into equal groups	3.4.3	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	Identify a division situation based on a given division expression	3.4.4	<i>Coming Soon</i>
3.OA.B.6	Represent a division problem as an equivalent multiplication problem with an unknown factor	3.4.6	<i>Coming Soon</i>
	Determine a quotient by representing a division problem as an equivalent multiplication problem	3.4.6	<i>Coming Soon</i>
3.OA.B.5	Apply the associative property as a strategy to multiply	3.4.13	<i>Coming Soon</i>
	Apply the distributive property as a strategy to multiply	3.4.14 and 3.4.16	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.NF.A.2.A	Recognize that when the interval 0 to 1 is partitioned into b equal parts, each part has size $1/b$	3.5.6	<i>Coming Soon</i>
3.NF.A.2.B	Represent a fraction a/b with a model, including a number line (where b is 2, 3, 4, 6, or 8)	3.5.7	<i>Coming Soon</i>
	Recognize simple equivalent fractions (with denominators 2, 3, 4, 6, and 8)	3.5.10	<i>Coming Soon</i>
	Generate simple equivalent fractions (with denominators 2, 3, 4, 6, and 8)	3.5.11	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.NF.A.3.D	Compare two fractions with the same numerator by reasoning about their size	3.5.16	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 6, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.MD.A.1	Tell and write time to the nearest minute	3.6.9	<i>Coming Soon</i>
	Measure time intervals in minutes (within 60 minutes), including finding elapsed time	3.6.10 and 3.6.11	<i>Coming Soon</i>
	Solve word problems involving addition of time intervals in minutes	3.6.10 and 3.6.11	<i>Coming Soon</i>
3.MD.A.2	Use subtraction to solve one-step word problems involving masses or volumes that are given in the same units	3.6.12	<i>Coming Soon</i>
	Use multiplication to solve one-step word problems involving masses or volumes that are given in the same units	3.6.12	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.G.A.1	Understand that shapes in different categories may share attributes	3.7.1	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.MD.D.8	Solve mathematical problems involving the perimeters of polygons	3.7.8	<i>Coming Soon</i>
	Solve real-world problems involving finding the missing side length of a polygon when the perimeter is given	3.7.9	<i>Coming Soon</i>
	Differentiate between perimeter and area and recognize that figures can have the same perimeter and different areas	3.7.10 and 3.7.11	<i>Coming Soon</i>

Milestone 8

Assess after: Unit 8, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
3.OA.D.8	Represent a two-step word problem using equations with a letter standing for the unknown quantity	3.8.5	<i>Coming Soon</i>
	Use addition and subtraction within 1,000 and multiplication and division within 100 to solve two step real-world problems	3.8.5	<i>Coming Soon</i>
3.OA.C.7	Fluently multiply within 100, using strategies such as the relationship between multiplication and division or properties of operations	3.8.8	<i>Coming Soon</i>
	Fluently divide within 100, using strategies such as the relationship between multiplication and division or properties of operations	3.8.9	<i>Coming Soon</i>

Grade 4 Learning Component Map

Milestone 1	Assess after: Unit 2, Section A
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.OA.B.4	Determine whether a whole number within 100 is prime or composite	4.1.3	<i>Coming Soon</i>
	Find all factor pairs of a whole number within 100	4.1.4	<i>Coming Soon</i>
	Determine whether a whole number within 100 is a multiple of a given one-digit number	4.1.5	<i>Coming Soon</i>
4.NF.A.2*	Compare two fractions with different numerators and different denominators (Restricted to comparisons to benchmark fractions)	4.2.6	<i>Coming Soon</i>

Milestone 2	Assess after: Unit 3, Section A
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.NF.A.1	Explain why a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ using visual fraction models	4.2.7 and 4.2.9	<i>Coming Soon</i>
	Generate equivalent fractions using the principle $a/b = (n \times a)/(n \times b)$	4.2.10	<i>Coming Soon</i>
4.NF.A.2	Compare two fractions with different numerators and different denominators	4.2.12	<i>Coming Soon</i>
4.NF.B.4.b	Represent a multiple of a/b as a multiple of $1/b$	4.3.5	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.NF.B.3.c	Add mixed numbers with like denominators	4.3.8, 4.3.12	<i>Coming Soon</i>
	Subtract mixed numbers with like denominators	4.3.9, 4.3.12	<i>Coming Soon</i>
4.NF.B.3.d	Solve word problems involving subtraction of fractions referring to the same whole and having like denominators	4.3.10	<i>Coming Soon</i>
	Solve word problems involving addition of fractions referring to the same whole and having like denominators	4.3.15	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.NBT.A.2	Read and write multi-digit numbers up to 1,000,000 by moving between base-ten numerals (standard form) and expanded form	4.4.7	<i>Coming Soon</i>
	Compare two multi-digit numbers	4.4.12	<i>Coming Soon</i>
4.NBT.A.1	Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right	4.4.9	<i>Coming Soon</i>
	Apply concepts of place value to recognize quotients and products in multiplication and division problems involving whole numbers and a factor of 10	4.4.10	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.NBT.A.3	Round multi-digit whole numbers to any place within 1,000,000	4.4.16	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.OA.A.1	Interpret a multiplication equation as a comparison	4.5.2	<i>Coming Soon</i>
	Represent statements of multiplicative comparisons as multiplication equations	4.5.2	<i>Coming Soon</i>
4.OA.A.2	Use equations with a symbol for the unknown number to represent word problems involving multiplicative comparison	4.5.2	<i>Coming Soon</i>
	Divide to solve word problems involving multiplicative comparison	4.5.3	<i>Coming Soon</i>
4.MD.A.1	Record equivalent measurements in a two-column table	4.5.8	<i>Coming Soon</i>
	Convert a measurement from a larger unit to a smaller unit within a system of measurement	4.5.9	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 6, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.NBT.B.5	Multiply a two-digit number by a two-digit number using strategies based on place value or properties of operations	4.6.5, 4.6.8	<i>Coming Soon</i>
	Multiply a four-digit number by a one-digit number using strategies based on place value or properties of operations	4.6.7	<i>Coming Soon</i>
	Use models to explain the multiplication of three-digit numbers by one-digit numbers	4.6.7	<i>Coming Soon</i>
	Use models to explain the multiplication of two two-digit numbers	4.6.8	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 6, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.NBT.B.6	Find whole-number quotients (no remainders) of four-digit dividends and one-digit divisors using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division.	4.6.18	<i>Coming Soon</i>
	Find whole-number quotients (with remainders) four-digit dividends and one-digit divisors using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division.	4.6.19	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 6, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.OA.A.3	Represent multi-step real-world problems using the four operations with an equation with a letter standing for the unknown	4.6.22	<i>Coming Soon</i>
	Solve multi-step real-world problems using the four operations in situations where a remainder must be interpreted	4.6.22	<i>Coming Soon</i>

Milestone 8

Assess after: Unit 8, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
4.G.A.1	Draw parallel and perpendicular lines and identify them in two-dimensional figures	4.7.4	<i>Coming Soon</i>
	Draw rays and identify them in two-dimensional figures	4.7.5	<i>Coming Soon</i>
4.MD.C.7	Solve addition problems to find unknown angles on a diagram in real-world problems	4.7.15	<i>Coming Soon</i>
	Represent addition problems to find unknown angles on a diagram using an equation with a symbol for the unknown angle measure	4.7.15	<i>Coming Soon</i>
4.G.A.2	Classify two-dimensional figures based on the presence or absence of perpendicular or parallel lines	4.8.1	<i>Coming Soon</i>
	Identify right triangles	4.8.2	<i>Coming Soon</i>

Grade 5 Learning Component Map

Milestone 1

Assess after: Unit 1, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.MD.C.5.a	Find the volume of a right rectangular prism with whole-number side lengths by packing it with unit cubes	5.1.4	<i>Coming Soon</i>
	Represent threefold whole-number products as volume	5.1.4	<i>Coming Soon</i>
5.MD.C.5.b	Apply the formula $V = b \times h$ to find volumes of right rectangular prisms with whole number edge lengths in the context of solving real-world problems	5.1.5	<i>Coming Soon</i>
	Apply the formula $V = l \times w \times h$ to find volumes of right rectangular prisms with whole number edge lengths in the context of solving mathematical problems	5.1.6	<i>Coming Soon</i>
5.MD.C.5.c	Find volumes of solid figures composed of two non-overlapping right rectangular prisms by adding the volumes of the non-overlapping parts	5.1.8	<i>Coming Soon</i>
	Solve real-world problems by finding the volumes of solid figures composed of two non-overlapping right rectangular prisms by adding the volumes of the non-overlapping parts	5.1.11	<i>Coming Soon</i>

Milestone 2

Assess after: Unit 2, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.NF.B.3	Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers	5.2.4	<i>Coming Soon</i>
	Interpret a fraction as division of the numerator by the denominator ($a/b = a \div b$)	5.2.5	<i>Coming Soon</i>
5.NF.B.4.a	Interpret the product $(a/b) \times q$ as the result of a sequence of operations $a \times q \div b$, where q represents either a whole number or a fraction	5.2.7, 5.2.8	<i>Coming Soon</i>
5.NF.B.4.b*	Multiply fractional side lengths to find areas of rectangles (Restricted to multiplication of a fraction by a whole number)	5.2.9, 5.2.10	<i>Coming Soon</i>
	Represent fraction products as rectangular areas (Restricted to multiplication of a fraction by a whole number)	5.2.10	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.NF.B.6	Use equations to represent and solve a real-world fraction or mixed-number multiplication problem	5.3.9	<i>Coming Soon</i>
	Solve a real-world problem involving multiplication of fractions and mixed numbers	5.3.9	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.NF.B.7.a	Compute quotients of a unit fraction and a non-zero whole number	5.3.11	<i>Coming Soon</i>
5.NF.B.7.b	Compute the quotient of a whole number dividend and a unit fraction divisor	5.3.13	<i>Coming Soon</i>
5.NF.B.7.c	Solve real-world problems involving division of whole numbers by unit fractions	5.3.15	<i>Coming Soon</i>
	Solve real-world problems involving division of unit fractions by non-zero whole numbers	5.3.15	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.NBT.B.5	Fluently multiply 3-digit by 3-digit whole numbers using the standard algorithm	5.4.6, 5.4.18	<i>Coming Soon</i>
	Fluently multiply 2-digit by up to 3-digit whole numbers using the standard algorithm	5.4.6	<i>Coming Soon</i>
5.NBT.B.6	Find whole number quotients of whole numbers with three-digit dividends and two-digit divisors using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division	5.4.12	<i>Coming Soon</i>
	Find whole number quotients of whole numbers with four-digit dividends and two-digit divisors using strategies based on place value, the properties	5.4.13	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section C

Standards

Key Learning Components

Focus Lessons

Instructional Moves

of operations, and/or the relationship between multiplication and division

Milestone 5

Assess after: Unit 5, Section B

Standards

Key Learning Components

Focus Lessons

Instructional Moves

5.NBT.A.3.a

Read and write decimals to thousandths by moving between base-ten numerals (standard form) and number names (word form)

5.5.3

Coming Soon

Read and write decimals to the thousandths by moving between base-ten numerals (standard form) and expanded form

5.5.3

Coming Soon

5.NBT.A.3.b

Compare two decimals to the thousandths

5.5.5

Coming Soon

5.NBT.B.7

Add decimals to the hundredths using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction

5.5.11

Coming Soon

Subtract decimals to the hundredths using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction

5.5.14

Coming Soon

Milestone 6

Assess after: Unit 6, Section A

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.NBT.B.7	Multiply decimals to the hundredths using concrete models or drawings and strategies based on place value and/or properties of operations	5.5.20	<i>Coming Soon</i>
	Divide decimals to the hundredths using concrete models or drawings and strategies based on place value and/or properties of operations	5.5.25	<i>Coming Soon</i>
5.NBT.A.1	Recognize that in a multi-digit number (including decimals), a digit in one place represents $\frac{1}{10}$ what it represents in the place to its left	5.6.1	<i>Coming Soon</i>
	Recognize that in a multi-digit number (including decimals), a digit in one place represents ten times what it represents in the place to its right	5.6.1	<i>Coming Soon</i>
5.NBT.A.2	Use whole-number exponents to denote powers of 10	5.6.2	<i>Coming Soon</i>
	Explain patterns in the placement of the decimal point when multiplying a decimal by a power of 10	5.6.3	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 6, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.NF.A.1	Subtract fractions with different denominators by using equivalent fractions	5.6.9	<i>Coming Soon</i>
	Add fractions with different denominators by using equivalent fractions	5.6.9	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 6, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	Subtract mixed numbers with different denominators by using equivalent fractions	5.6.11	<i>Coming Soon</i>
5.NF.A.2	Solve word problems involving subtraction of fractions referring to the same whole, including with different denominators	5.6.9	<i>Coming Soon</i>
	Solve word problems involving addition of fractions referring to the same whole, including with different denominators	5.6.12	<i>Coming Soon</i>

Milestone 8

Assess after: Unit 7, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
5.G.A.1	Interpret the x-coordinate of an ordered pair as the distance to travel along the x-axis from the origin and the y-coordinate of an ordered pair as the distance to travel along the y-axis from the origin	5.7.2	<i>Coming Soon</i>
5.OA.B.3	Identify apparent relationships between corresponding terms	5.7.9	<i>Coming Soon</i>
	Form ordered pairs consisting of corresponding terms from two patterns and graph the ordered pairs on a coordinate plane	5.7.11	<i>Coming Soon</i>
5.G.A.2	Interpret coordinate values of points in the context of the situation	5.7.12	<i>Coming Soon</i>

Milestone 8	Assess after: Unit 7, Section C
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	Represent mathematical problems by graphing points in the first quadrant of the coordinate plane	5.7.12	<i>Coming Soon</i>

Grade 6 Learning Component Map

Milestone 1	Assess after: Unit 1, Section E
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.G.A.1	Find area of quadrilaterals by composing into rectangles or decomposing into triangles and other shapes, and use to solve mathematical problems	6.1.2	View
	Find area of polygons by composing into rectangles or decomposing into triangles and other shapes, and use to solve real-world problems	6.1.3	View
6.G.A.4	Represent three-dimensional figures using nets made up of rectangles and triangles	6.1.14	Coming Soon
	Use nets to find the surface area of a three-dimensional figures	6.1.15	Coming Soon

Milestone 2	Assess after: Unit 2, Section D
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.RP.A.1	Write a ratio to represent the relationship between two quantities	6.2.1	Coming Soon
	Use ratio language to describe a ratio relationship between two quantities	6.2.1	View
6.RP.A.3.a	Find missing values in ratio tables	6.2.11	Coming Soon
	Use tables to compare ratios	6.2.12	View

Milestone 3

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.RP.A.3.b	Solve unit rate problems including those involving unit pricing and constant speed	6.3.5, 6.3.9	<i>Coming Soon</i>
6.RP.A.3.c	Find a percent of a quantity as a rate per 100	6.3.11	<i>Coming Soon</i>
	Solve problems involving finding the whole when given a part and the percent	6.3.14	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.NS.A.1	Solve word problems involving the division of fractions by fractions by using visual fraction models to represent the problem	6.4.4 and 6.4.5	View
	Compute quotients of fractions	6.4.10	<i>Coming Soon</i>
	Solve word problems involving the division of fractions by fractions	6.4.16	<i>Coming Soon</i>
6.G.A.2	Use the formulas $V=lwh$ and $V=bh$ to find volumes of right rectangular prisms with fractional edge lengths to solve mathematical problems	6.4.15	<i>Coming Soon</i>
	Find the volume of right rectangular prisms with fraction edge-lengths by packing it with unit cubes of the appropriate unit fraction edge lengths	6.4.15	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.NS.B.3	Fluently subtract multi-digit decimals using the standard algorithm	6.5.3	<i>Coming Soon</i>
	Fluently add multi-digit decimals using the standard algorithm	6.5.3	<i>Coming Soon</i>
	Fluently multiply multi-digit decimals using the standard algorithm	6.5.6	<i>Coming Soon</i>
	Fluently divide multi-digit decimals using the standard algorithm	6.5.13	View
6.NS.B.2	Fluently divide multi-digit whole numbers using the standard algorithm	6.5.11	View

Milestone 6

Assess after: Unit 6, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.EE.B.7	Solve mathematical problems by solving equations in the form $px = q$ for cases in which p , q , and x are all nonnegative rational numbers	6.6.4	<i>Coming Soon</i>
	Represent real-world problems by writing equations in the form $px = q$ for cases in which p , q , and x are all nonnegative rational numbers	6.6.5	<i>Coming Soon</i>
	Solve real-world problems by solving equations in the form $x + p = q$ for cases in which p , q , and x are all nonnegative rational numbers	6.6.5	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 6, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.EE.C.9	Analyze the relationship between dependent and independent variables using graphs and tables and relate to an equation	6.6.16	<i>Coming Soon</i>
	Represent a real-world situation by writing an equation that expresses the dependent variable in terms of the independent variable	6.6.16	<i>Coming Soon</i>
	Model the relationship between independent and dependent variables to solve real-world problems	6.6.16	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.NS.C.6.a	Recognize that opposite signs of numbers are located on opposite sides of 0 on the number line	6.7.2	<i>Coming Soon</i>
	Recognize that the opposite of the opposite of a number is the number itself	6.7.2	<i>Coming Soon</i>
6.NS.C.6.c	Find and position integers and other rational numbers on a vertical or horizontal number line diagram	6.7.2	<i>Coming Soon</i>
	Find and position integers and other rational numbers on a coordinate plane	6.7.11	<i>Coming Soon</i>
6.NS.C.6.b	Use the signs of numbers in an ordered pair to identify the quadrant of the point	6.7.11	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	Use the signs of numbers in ordered pairs to identify when two ordered pairs represent reflections across one or both axes	6.7.11	<i>Coming Soon</i>

Milestone 8

Assess after: Unit 8, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.SPA.2	Recognize a data distribution that is symmetric, skewed left, or skewed right	6.8.8	<i>Coming Soon</i>
6.SP.B.5.c	Summarize numerical data sets in relation to their context by calculating quantitative measures of center (median and/or mean)	6.8.10 and 6.8.13	<i>Coming Soon</i>
	Summarize numerical data sets in relation to their context by calculating quantitative measures of variability (interquartile range and/or mean absolute deviation)	6.8.11 and 6.8.15	<i>Coming Soon</i>
6.SP.B.5.d	Summarize numerical data sets in relation to their context by relating the choice of measures of center to the shape of the data distribution and the context in which the data were gathered	6.8.14	View

Grade 6 Accelerated Learning Component Map

Milestone 1	Assess after: Unit 1, Section D
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.G.A.1	Find area of quadrilaterals by composing into rectangles or decomposing into triangles and other shapes, and use to solve mathematical problems	6.1.2	View
	Find area of polygons by composing into rectangles or decomposing into triangles and other shapes, and use to solve real-world problems	6.1.2	View
6.G.A.4	Represent three-dimensional figures using nets made up of rectangles and triangles	6.1.11	Coming Soon
	Use nets to find the surface area of a three-dimensional figures	6.1.12	Coming Soon

Milestone 2	Assess after: Unit 2, Section E
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.RP.A.1	Write a ratio to represent the relationship between two quantities	6.2.1	Coming Soon
	Use ratio language to describe a ratio relationship between two quantities	6.2.1	View
6.RP.A.3.a	Find missing values in ratio tables	6.2.9	Coming Soon
	Use tables to compare ratios	6.2.10	View

Milestone 2

Assess after: Unit 2, Section E

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.RP.A.3.b	Solve unit rate problems including those involving unit pricing and constant speed	6.2.17, 6.2.18	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.RP.A.3.c	Find a percent of a quantity as a rate per 100	6.2.22	<i>Coming Soon</i>
	Solve problems involving finding the whole, given a part and the percent	6.2.24	<i>Coming Soon</i>
6.NS.A.1	Compute quotients of fractions	6.3.7	<i>Coming Soon</i>
	Solve word problems involving division of fractions by fractions	6.3.12	<i>Coming Soon</i>
6.G.A.2	Use the formulas $V=lwh$ and $V=bh$ to find volumes of right rectangular prisms with fractional edge lengths to solve mathematical problems	6.3.11	<i>Coming Soon</i>
	Find the volume of right rectangular prisms with fraction edge-lengths by packing it with unit cubes of the appropriate unit fraction edge lengths	6.3.11	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 4, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.NS.B.3	Fluently subtract multi-digit decimals using the standard algorithm	6.3.15	<i>Coming Soon</i>
6.NS.B.2	Fluently divide multi-digit whole numbers using the standard algorithm	6.3.18	View
6.EE.B.7	Represent real-world problems by writing equations of the form $px = q$ for cases in which p , q , and x are all nonnegative rational numbers	6.4.5	<i>Coming Soon</i>
	Solve real-world problems by solving equations of the form $x + p = q$ for cases in which p , q , and x are all nonnegative rational numbers	6.4.5	<i>Coming Soon</i>
6.EE.A.4	Determine whether expressions are equivalent using the properties of operations to simplify or expand expressions	6.4.10	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.EE.C.9	Represent a real-world situation by writing an equation that expresses the dependent variable in terms of the independent variable	6.4.16	<i>Coming Soon</i>
	Model the relationship between independent and dependent variables to solve real-world problems	6.4.16	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.RP.A.2.b	Identify or determine the constant of proportionality (unit rate) in tables of proportional relationships	6.5.1	View
7.RP.A.2.c	Represent proportional relationships with equations	6.5.1, 6.5.2	View
7.RP.A.2b	Identify or determine the constant of proportionality (unit rate) in verbal descriptions of proportional relationships	6.5.1, 6.5.3	View
7.RP.A.2c	Represent proportional relationships with equations	6.5.1, 6.5.2	View

Milestone 6

Assess after: Unit 6, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.G.B.4	Find the circumference of a circle to solve problems, including by using the formula for circumference of a circle.	6.5.13	View
	Find the area of a circle to solve problems, including by using the formula for area of a circle.	6.5.16	View
7.EE.A.2	Rewrite an expression in different forms in a problem context	6.6.2	Coming Soon
	Interpret how quantities in an expression are related	6.6.6	Coming Soon

Milestone 6

Assess after: Unit 6, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.RP.A.3	Solve multi-step ratio problems, including by using proportional relationships	6.6.10	<i>Coming Soon</i>
	Solve multi-step percent problems, including by using proportional relationships	6.6.10	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section F

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.NS.A.1.d	Use properties of operations to add rational numbers	6.7.7 and 6.7.18	View
	Use properties of operations to subtract rational numbers	6.7.10 and 6.7.18	View
7.NS.A.3	Subtract rational numbers to solve real-world problems	6.7.10	View
	Multiply rational numbers to solve real-world problems	6.7.14 and 6.7.15	View
7.NS.A.2.c	Apply properties of operations as strategies to multiply rational numbers	6.7.15	View
	Apply properties of operations as strategies to divide rational numbers	6.7.18	View

Milestone 8

Assess after: Unit 8, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
6.SP.B.5.c	Summarize numerical data sets in relation to their context by calculating quantitative measures of center (median and/or mean)	6.8.4, 6.8.6	<i>Coming Soon</i>
	Summarize numerical data sets in relation to their context by calculating quantitative measures of variability (interquartile range and/or mean absolute deviation)	6.8.5, 6.8.7	<i>Coming Soon</i>
7.SP.A.1	Understand that generalizations about a population from a sample are valid only if the sample is representative of that population	6.8.9	<i>Coming Soon</i>
7.SP.A.2	Use data from a random sample to draw inferences about a population with an unknown characteristic of interest	6.8.11	<i>Coming Soon</i>
7.SP.C.5	Interpret smaller probabilities as less likely and larger probabilities as more likely, including probabilities near 0.5 as equally likely	6.8.13	<i>Coming Soon</i>
7.SP.C.8	Find probabilities of compound events, including those without replacement	6.8.16	<i>Coming Soon</i>

Grade 7 Learning Component Map

Milestone 1

Assess after: Unit 2, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.G.A.1	Compute actual lengths from a scale drawing (using proportional reasoning)	7.1.7	View
	Compute actual areas from a scale drawing (using proportional reasoning)	7.1.10	View
7.RP.A.2.b	Identify or determine the constant of proportionality (unit rate) in verbal descriptions of proportional relationships	7.2.2	View
	Identify or determine the constant of proportionality (unit rate) in tables of proportional relationships	7.2.2, 7.2.3	View
7.RP.A.2.c	Represent proportional relationships with equations	7.2.4	View

Milestone 2

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.RP.A.2.a	Determine whether two quantities presented in a graph are in a proportional relationship	7.2.10 and 7.3.1	<i>Coming Soon</i>
	Determine whether two quantities presented in a table are in a proportional relationship	7.2.10 and 7.3.1	<i>Coming Soon</i>

Milestone 2

Assess after: Unit 3, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.RP.A.2.d	Explain what a point $(1, r)$, where r is the unit rate, on the graph of a proportional relationship means in terms of the situation	7.2.11	<i>Coming Soon</i>
	Explain what a point (x, y) on the graph of a proportional relationship means in terms of the situation	7.2.11	<i>Coming Soon</i>
7.G.B.4	Find the circumference of a circle to solve problems, including by using the formula for circumference of a circle	7.3.4 and 7.3.5	View
	Find the area of a circle to solve problems, including by using the formula for area of a circle	7.3.9	View

Milestone 3

Assess after: Unit 4, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.EE.A.2	Rewrite an expression in different forms in a problem context	7.4.4	<i>Coming Soon</i>
	Interpret how quantities in an expression are related	7.4.8	<i>Coming Soon</i>
7.RP.A.3	Solve multi-step ratio problems, including by using proportional relationships	7.4.12	<i>Coming Soon</i>
	Solve multi-step percent problems, including by using proportional relationships	7.4.12	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 5, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.NS.A.1.d	Use properties of operations to add rational numbers	7.5.3 and 7.5.13	View
	Use properties of operations to subtract rational numbers	7.5.6 and 7.5.13	View
7.NS.A.3	Subtract rational numbers to solve real-world problems	7.5.7	View
	Multiply rational numbers to solve real-world problems	7.5.8, 7.5.9, and 7.5.10	View
7.NS.A.2.c	Apply properties of operations as strategies to multiply rational numbers	7.5.10	View
	Apply properties of operations as strategies to divide rational numbers	7.5.13	View

Milestone 5

Assess after: Unit 6, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.EE.B.4.a	Solve equations of the forms $px + q = r$ and $p(x + q) = r$ fluently	7.6.9	Coming Soon
	Write multi-step equations to represent real-world problems, including using rational numbers	7.6.11	Coming Soon
7.EE.B.3	Solve multi-step real-life problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals)	7.6.11	Coming Soon

Milestone 5

Assess after: Unit 6, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.EE.B.4.b	Write multi-step inequalities to represent real-world problems, including using rational numbers	7.6.14, 7.6.17	<i>Coming Soon</i>
	Graph the solution set of a multi-step inequality	7.6.15	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 7, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.EE.A.1	Add linear expressions with rational coefficients	7.6.18	<i>Coming Soon</i>
	Expand linear expressions with rational coefficients	7.6.19	<i>Coming Soon</i>
7.G.B.5	Write equations for multi-step problems to find an unknown angle	7.7.4	<i>Coming Soon</i>
	Find an unknown angle, including by writing and solving equations	7.7.5	<i>Coming Soon</i>
7.G.A.2	Know and understand conditions that determine a unique triangle, more than one triangle, or no triangle	7.7.9 and 7.7.10	View

Milestone 7

Assess after: Unit 8, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.G.B.6	Determine the surface area of three-dimensional prisms in mathematical problems	7.7.14	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 8, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	Determine the volume of three-dimensional objects composed of cubes and right prisms in real-world problems	7.7.15	<i>Coming Soon</i>
7.SP.C.5	Interpret smaller probabilities as less likely and larger probabilities as more likely, including probabilities near 0.5 as equally likely	7.8.2	<i>Coming Soon</i>
7.SP.C.8	Find probabilities of compound independent events	7.8.8	<i>Coming Soon</i>
	Find probabilities of compound events, including those without replacement	7.8.9	<i>Coming Soon</i>

Milestone 8

Assess after: Unit 8, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.SP.B.3	Measure the difference between the centers of two numerical data distributions by expressing it as a multiple of a measure of variability	7.8.11	<i>Coming Soon</i>
7.SP.A.1	Understand that generalizations about a population from a sample are valid only if the sample is representative of that population	7.8.13	<i>Coming Soon</i>
7.SP.A.2	Use data from a random sample to draw inferences about a population with an unknown characteristic of interest	7.8.15 and 7.8.16	<i>Coming Soon</i>
7.SP.B.4	Draw informal comparative inferences about numerical data from random samples of two	7.8.18 and 7.8.19	<i>Coming Soon</i>

Milestone 8	Assess after: Unit 8, Section D
-------------	---------------------------------

Standards	Key Learning Components	Focus Lessons	Instructional Moves
	populations, including by using measures of center and variability		

Grade 7 Accelerated Learning Component Map

Milestone 1

Assess after: Unit 1, Section F

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.G.A.3	Describe the effects of a series of basic rigid motions (translations, rotations, and reflections) on two-dimensional figures in the coordinate plane, including the use of coordinates and algebraic representation	7.1.5	View
8.G.A.1.a	Verify that no combination of basic rigid motions will alter the length of a line segment	7.1.6	View
8.G.A.1.b	Verify that no combination of basic rigid motions will alter the measure of an angle	7.1.6	View
8.G.A.1.c	Verify that no combination of basic rigid motions will change whether two lines or line segments are parallel or not	7.1.8	View
8.G.A.2	Describe a sequence of transformations that exhibits congruence between two given congruent figures	7.1.10, 7.1.11	View
8.G.A.5	Establish and use facts about angles created when parallel lines are cut by a transversal	7.1.12	View

Milestone 2

Assess after: Unit 2, Section F

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.B.6	Use similar triangles to explain why the slope of a line graphed on the coordinate plane is consistent	7.1.9	<i>Coming Soon</i>
7.G.A.1	Compute actual lengths from a scale drawing (using proportional reasoning)	7.2.4	View
	Compute actual areas from a scale drawing (using proportional reasoning)	7.2.6	View
8.G.A.3	Describe the effect of dilation on two-dimensional figures in the coordinate plane, including the use of coordinates and algebraic representation	7.2.10 and 7.2.11	View
8.G.A.4	Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations	7.2.12	View
	Given two similar two-dimensional figures, describe a sequence that exhibits the similarity between them	7.2.12	View

Milestone 3

Assess after: Unit 3, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.EE.B.4.a	Solve equations of the forms $px + q = r$ and $p(x + q) = r$ fluently	7.3.8	<i>Coming Soon</i>
	Write multi-step equations to represent real-world problems, including using rational numbers	7.3.10	<i>Coming Soon</i>

Milestone 3

Assess after: Unit 3, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.EE.B.3	Solve multi-step real-life problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals)	7.3.10	<i>Coming Soon</i>
7.EE.B.4.b	Write multi-step inequalities to represent real-world problems, including using rational numbers	7.3.14, 7.3.17	<i>Coming Soon</i>
	Graph the solution set of a multi-step inequality	7.3.15	<i>Coming Soon</i>

Milestone 4

Assess after: Unit 5, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
7.EE.A.1	Factor linear expressions with rational coefficients	7.4.2	<i>Coming Soon</i>
	Expand linear expressions with rational coefficients	7.4.2	<i>Coming Soon</i>
8.EE.C.7.b	Solve a linear equation with rational coefficients	7.4.9	<i>Coming Soon</i>
8.EE.C.7.a	Generate examples of a linear equation in one variable with one solution, many solutions, and no solutions	7.4.10	<i>Coming Soon</i>
8.EE.B.5	Compare two proportional relationships represented in different ways	7.5.2	<i>Coming Soon</i>
8.EE.B.6	Write the equation $y = mx$ for a line graphed through the origin	7.5.6	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section G

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.C.8.a	Understand that solutions to a system of linear equations correspond to the points of intersection of their graphs	7.5.14	<i>Coming Soon</i>
8.EE.C.8.b	Identify solutions to systems of linear equations visually on graphs	7.5.14	<i>Coming Soon</i>
	Solve systems of linear equations algebraically	7.5.15 and 7.5.16	<i>Coming Soon</i>
8.SPA.1	Interpret scatterplots and recognize patterns of association in the data	7.5.19	<i>Coming Soon</i>
8.SPA.3	Interpret the slope of a line of best fit	7.5.22	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 6, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.F.A.1	Identify a relationship as a function if it assigns exactly one output to every input	7.6.2	<i>Coming Soon</i>
8.F.B.5	Qualitatively describe the relationship between two quantities by analyzing the graph of a function that relates the two quantities	7.6.4	<i>Coming Soon</i>
8.F.A.2	Compare properties of two functions each represented in a different way	7.6.6	<i>Coming Soon</i>
7.G.B.6	Determine the surface area of three-dimensional prisms in mathematical problems	7.6.13	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section E

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.A.1	Use exponent properties to generate equivalent numerical expressions with integer exponents	7.7.5	View
8.EE.A.4	Add, subtract, multiply, and divide numbers written in scientific notation	7.7.10, 7.7.12, and 7.7.13	View

Milestone 8

Assess after: Unit 8, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.A.2	Recognize and evaluate the roots of perfect squares and cubes	7.8.3 and 7.8.12	View
	Represent the solutions of simple quadratic and cubic expressions by using square and cube roots	7.8.4 and 7.8.12	View
8.G.B.7	Use the Pythagorean Theorem to solve for an unknown side length in right triangles in real-world problems in two and three dimensions	7.8.9	Coming Soon
	Use the Pythagorean Theorem to solve for an unknown side length in right triangles in mathematical problems in two and three dimensions	7.8.9	Coming Soon
8.G.B.8	Use the Pythagorean Theorem to solve for the distance between two points in a coordinate system in mathematical problems	7.8.11	Coming Soon

Grade 8 Learning Component Map

Milestone 1

Assess after: Unit 1, Section D

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.G.A.3	Describe the effect of rotations that are multiples of 90 degrees on two-dimensional figures in the coordinate plane, including the use of coordinates and algebraic representation	8.1.5	View
	Describe the effects of a series of basic rigid motions (translations, rotations, and reflections) on two-dimensional figures in the coordinate plane, including the use of coordinates and algebraic representation	8.1.6	View
8.G.A.1.a	Verify that no combination of basic rigid motions will alter the length of a line segment	8.1.7	View
8.G.A.1.b	Verify that no combination of basic rigid motions will alter the measure of an angle	8.1.7	View
8.G.A.1.c	Verify that no combination of basic rigid motions will change whether two lines or line segments are parallel or not	8.1.9	View
8.G.A.2	Describe a sequence of transformations that exhibits congruence between two given congruent figures	8.1.12	View

Milestone 2

Assess after: Unit 2, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.G.A.3	Describe the effect of dilation on two-dimensional figures in the coordinate plane, including the use of coordinates and algebraic representation	8.2.4 and 8.2.5	View
8.G.A.4	Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations	8.2.6	View
	Given two similar two-dimensional figures, describe a sequence that exhibits the similarity between them	8.2.6	View
8.EE.B.6	Use similar triangles to explain why the slope of a line graphed on the coordinate plane is consistent	8.2.10	Coming Soon

Milestone 3

Assess after: Unit 3, Section E

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.B.5	Interpret the slope of the graph of a proportional relationship as the unit rate	8.3.3 and 8.3.6	Coming Soon
	Compare two proportional relationships represented in different ways	8.3.4	Coming Soon
8.EE.B.6	Write the equation $y = mx$ for a line graphed through the origin	8.3.7	Coming Soon
	Write the equation $y = mx + b$ for a line graphed not through the origin	8.3.7	Coming Soon

Milestone 4

Assess after: Unit 4, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.C.7.B	Solve a linear equation with rational coefficients	8.4.6	<i>Coming Soon</i>
8.EE.C.8.B	Solve simple systems of linear equations by inspection	8.4.12	<i>Coming Soon</i>
	Identify solutions to systems of linear equations visually on graphs	8.4.12	<i>Coming Soon</i>
	Solve systems of linear equations algebraically	8.4.13 and 8.4.14	<i>Coming Soon</i>

Milestone 5

Assess after: Unit 5, Section E or
Unit 5, Section C

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.F.A.3	Identify the graph of a line as representing a linear function	8.5.4 and 8.5.8	<i>Coming Soon</i>
	Recognize and give examples of functions that are (or are not) linear	8.5.4	<i>Coming Soon</i>
	Identify the equation $y = mx + b$ as representing a linear function	8.5.8	<i>Coming Soon</i>
8.F.B.4	Determine the initial value of a function from a real-world context presented in a table or graph	8.5.9	<i>Coming Soon</i>
	Model a linear relationship between two quantities with a function	8.5.10	<i>Coming Soon</i>
	Interpret the rate of change of a linear function in the context of the situation it models	8.5.11	<i>Coming Soon</i>

Milestone 6

Assess after: Unit 6, Section B

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.SP.A.1	Interpret scatterplots and recognize patterns of association in the data	8.6.3 and 8.6.8	<i>Coming Soon</i>
	Describe the linearity, strength, direction, and clusters or outliers of an association shown in a scatter plot	8.6.5 and 8.6.7	<i>Coming Soon</i>
8.SP.A.3	Interpret the intercept of a line of best fit	8.6.3	<i>Coming Soon</i>
	Interpret the slope of a line of best fit	8.6.6	<i>Coming Soon</i>
8.SP.A.2	Informally fit a straight line to model a data set	8.6.4	<i>Coming Soon</i>
	Informally assess the fit of a straight line used to model a data set by judging the closeness of the data points to the line	8.6.4	<i>Coming Soon</i>

Milestone 7

Assess after: Unit 7, Section E

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.A.1	Use exponent properties to generate equivalent numerical expressions with integer exponents	8.7.6	View
8.EE.A.4	Add, subtract, multiply, and divide numbers written in scientific notation	8.7.12, 8.7.14, and 8.7.15	View

Milestone 8

Assess after: Unit 8, Section E

Standards	Key Learning Components	Focus Lessons	Instructional Moves
8.EE.A.2	Recognize and evaluate the roots of perfect squares and cubes	8.8.3 and 8.8.14	View
	Represent the solutions of simple quadratic and cubic expressions by using square and cube roots	8.8.4 and 8.8.15	View
8.G.B.7	Use the Pythagorean Theorem to solve for an unknown side length in right triangles in mathematical problems in two and three dimensions	8.8.9	<i>Coming Soon</i>
	Use the Pythagorean Theorem to solve for an unknown side length in right triangles in real-world problems in two and three dimensions	8.8.11	<i>Coming Soon</i>
8.G.B.8	Use the Pythagorean Theorem to solve for the distance between two points in a coordinate system in mathematical problems	8.8.13	<i>Coming Soon</i>
